Feature**Sends Audio with computer screen through video Over IP**

ViP130 offers the great solution to Video over IP projection for your daily business meetings. With its state of the art technology, we upgrades your ordinary projector into the extraordinary displayed with amazing features one of that - Audio with computer screen

Split screen projection

4-to-1 split screen projection creates an ideal solution to dramatically increase the productivity of your daily meetings. Not only this feature makes it absolutely easy to work with up-to 4 applications side by side, but also helps to make maximum use of your high resolution projector. Most importantly, the great using experience brings 4 times of enjoyments and costs for only the price of single projector

Plug & Play

By equipping with "Plug and Show Token",

ViP130 brings an immediate and convenient access to any type of projection. Simply connect your PC/Laptop to ViP130 and insert Plug and Show token, images are on their way.

Conference Control

Conference Control features a web-based administrative tool, making it incredibly easy for administrator to control and manage the conference participants. With clear headings for conference participants, presenting sequences are managed in turns by a touch of a button.

PDA Video Over IP Projection

Using wisely the WiFi connectivity of your handheld device such as PDA, it offers a simple but effective way to project PDA images cordlessly. This revolutionary feature turns your PDA into the pocket presentation center, offering high level of mobility which suits your stylish business events.

Great OS Compatibility

Adapts to a wide range of Windows Operating Systems from Win2000, WinXP, furthermore to the latest Vista platform. Running smoothly as an application over any one of these systems, ViP130 does not require any driver at all. It is so easy and convenient to use whether the user login as an administrator, limited user, or even as a guest.

Security

Support Login code to protect other users from accessing presentation contents. During presentation, screen images can also be protected by WEP 64/128 encryption.

Why Wireless?

Stream computer video wirelessly at native resolution to any display without having to swap cables. Multiple users can wirelessly share a single display with the Conference Control function which allows the host to moderate the meeting.

- Show PowerPoint and/or multi-media presentations
- Prefect for displaying documents, spreadsheets, and drawings
- Surf the internet and check e-mail
- User friendly web-based user interface
