

WiH112 - Wireless multilingual Transmitter/Receiver with HD Output

The WiH112 delivers the high-definition movie or audio from PC, DVD, iPOD, to big screen or acoustic system. Convert audio and video signal wirelessly to the Air Sender receiver connected to the TV or acoustic system. WiH112 has group broadcasting function, once it connects to several WiH112 receivers, the video or audio is able to transmit to different places meanwhile.

WiH112 is a bridge between Audio/Video Source and High Definition Display. That could help you enjoy your movie via Home Theater. No matter where you store you're a/V files, Just connect the Air Tune with your data source via appropriate interface; the signal will be forwarded to the Air Player and display on your home TV Wirelessly. With WiH112 at home, it makes your life easier, smarter and more technology. By multiple interfaces and advanced wirelessly digit-analogy transmission, WiH112 performs great functions around your house.
